

# JAGAT GURU NANAK DEV PUNJAB STATE OPEN UNIVERSITY, PATIALA

(Established by Act No. 19 of 2019 of the Legislature of State of Punjab)

**The Motto of the University**

**(SEWA)**

**SKILL ENHANCEMENT**

**EMPLOYABILITY  
ACCESSIBILITY**

**WISDOM**

**M.S.C. (COMPUTER SCIENCE)  
SEMESTER-II**

**Course: DATA STRUCTURE & ALGORITHMS LAB (MSCS-2-02P)  
LABORATORY MANUAL**

**ADDRESS: C/28, THE LOWER MALL, PATIALA-147001**

**WEBSITE: [www.psou.ac.in](http://www.psou.ac.in)**

**SELF-INSTRUCTIONAL STUDY MATERIAL FOR JGND PSOU, ALL COPYRIGHTS WITH JGND PSOU, PATIALA**

**JAGAT GURU NANAK DEV  
PUNJAB STATE OPEN UNIVERSITY PATIALA**

ਪੰਜਾਬ ਸਟੇਟ ਓਪਨ ਯੂਨੀਵਰਸਿਟੀ  
ਪਟਿਆਲਾ

(Established by Act No.19 of 2019 of Legislature of the State of Punjab)

## **Faculty of School of Sciences and Emerging Technologies**

### **1. Dr. Baljit Singh Khehra (Head)**

Professor of Computer Science

Jagat Guru Nanak Dev Punjab State Open University, Patiala

### **2. Dr. Kanwalvir Singh Dhindsa**

Professor of Computer Science

Jagat Guru Nanak Dev Punjab State Open University, Patiala

### **3. Dr. Amitoj Singh**

Associate Professor of Computer Science

Jagat Guru Nanak Dev Punjab State Open University, Patiala

### **4. Dr. Karan Sukhija**

Assistant Professor of Computer Science

Jagat Guru Nanak Dev Punjab State Open University, Patiala

### **5. Dr. Monika Pathak**

Assistant Professor of Computer Science

Jagat Guru Nanak Dev Punjab State Open University, Patiala

## **JAGAT GURU NANAK DEV PUNJAB STATE OPEN UNIVERSITY PATIALA**

ਪੰਜਾਬ ਸਟੇਟ ਅਧਿਨ ਯੂਨੀਵਰਸਿਟੀ  
ਪਟਿਆਲਾ (Established by Act No.19 of 2019 of Legislature of the State of Punjab)

### **PREFACE**

Jagat Guru Nanak Dev Punjab State Open University, Patiala was established in December 2019 by Act 19 of the Legislature of State of Punjab. It is the first and only Open University of the State, entrusted with the responsibility of making higher education accessible to all especially to those sections of society who do not have the means, time or opportunity to pursue regular education.

In keeping with the nature of an Open University, this University provides a flexible education system to suit every need. The time given to complete a programme is double the duration of a regular mode programme. Well-designed study material has been prepared in consultation with experts in their respective fields.

The University offers programmes which have been designed to provide relevant, skill-based and employability-enhancing education. The study material provided in this booklet is self-instructional, with self-assessment exercises, and recommendations for further readings. The syllabus has been divided in sections, and provided as units for simplification.

The Learner Support Centres/Study Centres are located in the Government and Government aided colleges of Punjab, to enable students to make use of reading facilities, and for curriculum-based counselling and practicals. We, at the University, welcome you to be a part of this institution of knowledge.

Prof. G. S. Batra,  
Dean Academic Affairs

# **DATA STRUCTURE AND ALGORITHMS**

## **LABORATORY MANUAL**

**M.Sc (Computer Science)**

**(1<sup>st</sup> Year-2<sup>nd</sup> Semester)**

**SCHOOL OF SCIENCES & EMERGING  
TECHNOLOGIES**

**JAGAT GURU NANAK DEV  
PUNJAB STATE OPEN UNIVERSITY,  
PATIALA**

## **Programme Outcomes (POs)**

### ***Programme: MSc (Computer Science)***

#### **Programme Outcomes (POs)**

**On successful completion of this programme, the students will be able to:**

<b>PO1</b>	Develop an understanding of basic theoretical principles in computer science and perspectives in computer science by critical thinking.
<b>PO2</b>	Identify, formulate, review research literature, and analyze problems reaching substantiated conclusions using principles of computer science
<b>PO3</b>	Design solutions for problems and design system processes that meet the specified needs with appropriate consideration for the public health and safety, and the environmental considerations.
<b>PO4</b>	Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
<b>PO5</b>	Create, select and use appropriate techniques, skills, and modern IT tools necessary for computing practice with an understanding of the limitations.
<b>PO6</b>	Apply ethical principles in their research and professional activities and familiar with the professional standards and practices of the field of computer science.
<b>PO7</b>	Work collaboratively with others, both within and outside of their discipline, to solve complex problems and develop innovative solutions.
<b>PO8</b>	Communicate their ideas and research findings effectively to both technical and non-technical audiences, through written reports, oral presentations, and other media.
<b>PO9</b>	Demonstrate knowledge and understanding of the science and management principles and apply these to one's own work, as a member and leader of diverse teams, to manage projects and in multidisciplinary environments.
<b>PO10</b>	Recognize the need for, and have the preparation and ability to engage in continuing professional development and life-long learning in the broadest context of technological change.

## ***Programme: MSc (Computer Science)***

### **Programme Specific Outcomes (PSOs)**

**On successful completion of this programme, the students will be able to:**

<b>PSO1</b>	Design and implement software solutions to complex problems using computer programming languages.
<b>PSO2</b>	Understand computer systems, including operating systems, networks, and databases for designing and developing computer-based systems.
<b>PSO3</b>	develop professional skills such as communication, teamwork, and project management that are essential for success in the computer science industry.
<b>PSO4</b>	Apply software engineering principles to develop and manage software projects, including requirements analysis, design, implementation, and testing.
<b>PSO5</b>	Gain ability to apply knowledge of Computer Science to the real-world issues.

**Course: Operating Systems Lab**

**Course Code: MSCS-2-01P**

**Course Outcomes (COs)**

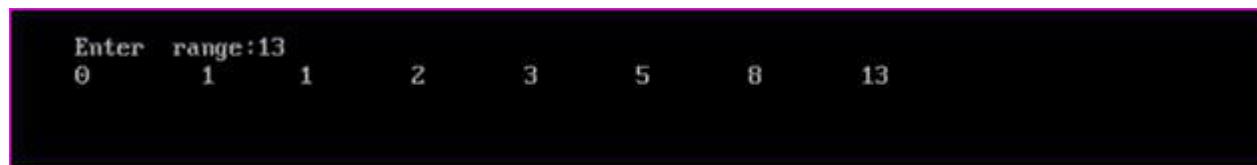

**After the completion of this course, the students will be able to:**

CO1	Implement basic data structures such as arrays and linked list.
CO2	Develop programs to demonstrate fundamental algorithmic problems including Tree Traversals, Graph traversals, and shortest paths.
CO3	Develop programs to demonstrate the implementation of various operations on stack and queue
CO4	Implement various searching and sorting algorithms.
CO5	Develop programs to apply hashing approach.

1. Aim: To display Fibonacci series up to a range.

```
#include<stdio.h>
#include<conio.h>
void main()
{
int a,b,c,n;
clrscr();
printf("\n Enter range:");
scanf("%d",&n);
a=0,b=1,c=0;
printf("%d \t %d",a,b);
c=a+b;
while(c<=n)
{
printf("\t%d",c);
a=b;
b=c;
c=a+b;
}
getch();
}
```

Output:

```
Enter range:13
0      1      1      2      3      5      8      13
```

2. Aim: To read n numbers and display it.

```
#include<stdio.h>
#include<conio.h>

void main()
{
int i,n, a[10];
clrscr();
printf("\nEnter the number of element : \n");
scanf("%d",&n);
printf("Enter element: \n");
for(i=0;i<n;i++)
{
printf("a[%d]=",i);
```

```

scanf("%d",&a[i]);
}
printf("\n Display array element: \n");
for(i=0;i<n;i++)
{
printf("a[%d]=%d\n",i,a[i]);

}
getch();
}

```

Output:

```

Enter the number of element :
6
Enter element:
a[0]=54
a[1]=45
a[2]=67
a[3]=76
a[4]=78
a[5]=98

Display array element:
a[0]=54
a[1]=45
a[2]=67
a[3]=76
a[4]=78
a[5]=98
-

```

3. Aim: To demonstrate the concept of one dimensional array finding the sum of array elements.

```

#include<stdio.h>
#include<conio.h>

void main()
{
int i,n, a[10],s;
clrscr();
printf("Enter the number of element :\n");
scanf("%d",&n);
s=0;
printf("Enter element:\n");
for(i=0;i<n;i++)

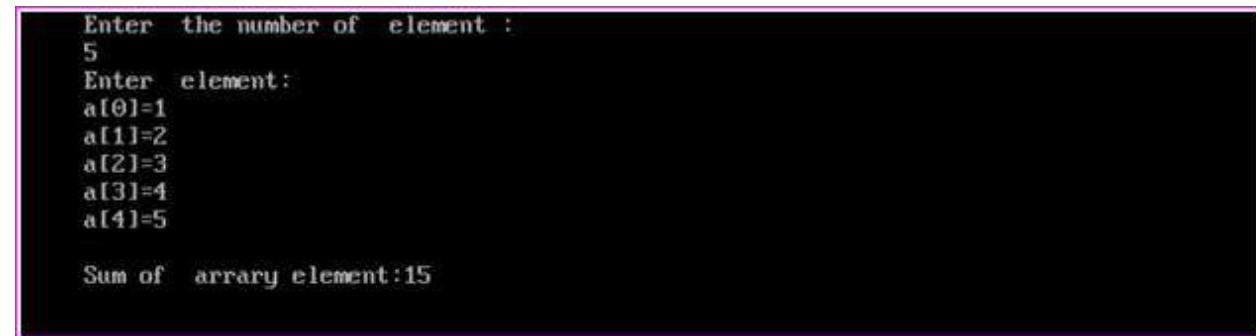

```

```

{
printf("a[%d]=",i);
scanf("%d",&a[i]);
s=s+a[i];
}
printf("Sum of array element:%d",s);
getch();
}

```

Output:

```

Enter the number of element :
5
Enter element:
a[0]=1
a[1]=2
a[2]=3
a[3]=4
a[4]=5

Sum of arrary element:15

```

4. Aim: To insert an element in an array.

```

#include<stdio.h>
#include<conio.h>
{
int i,n,pos,num, a[10];
clrscr();
printf("Enter the number of element :\n");
scanf("%d",&n);
printf("Enter element:\n");
for(i=0;i<n;i++)
{
printf("a[%d]=",i);
scanf("%d",&a[i]);
}
printf("\nEnter the pos where the no. is to be inserted :");
scanf("%d",&pos);
printf("\nEnter the the no. is to be inserted :");
scanf("%d",&num);
for(i=n-1;i>=pos;i--)
{
a[i+1]=a[i];
n=n+1;
a[pos]=num;
}

```

```

printf("\n Display array after insertion:\n");
for(i=0;i<n;i++)
{
printf("a[%d]=%d\n",i,a[i]);
}
getch();
}

```

Output:

```

Enter the number of element :4
Enter element:
a[0]=10
a[1]=22
a[2]=33
a[3]=44

Enter the pos where the no. is to be inserted :2
Enter the the no. is to be inserted :90
Display array after insertion:
a[0]=10
a[1]=22
a[2]=90
a[3]=33
a[4]=44

```

5. To delete an element from an array.

```

#include<stdio.h>
#include<conio.h>
void main()
{
int i,n,pos, a[10];
clrscr();
printf("Enter the number of elements :\n");
scanf("%d",&n);
printf("Enter element: \n ");
for(i=0;i<n;i++)
{
printf("a[%d]=",i);
scanf("%d",&a[i]);
}
printf("\nEnter the pos from which the no. has to be deleted :");
scanf("%d",&pos);
for(i=pos;i<n;i++)

```

```

a[i]=a[i+1];
n=n-1;
printf("\n Displar array after deletion: \n ");
for(i=0;i<n;i++)
{
printf("\n a[%d]=%d",i,a[i]);
}
getch();
}

```

Output:

```

Enter the number of elements :7
Enter element:a[0]=12
a[1]=23
a[2]=43
a[3]=25
a[4]=78
a[5]=45
a[6]=14

Enter the pos from which the no. has to be deleted :4

Displar array after deletion:
a[0]=12
a[1]=23
a[2]=43
a[3]=25
a[4]=45
a[5]=14

```

6. Aim: Implementation of linked list using array.

```

#include<stdio.h>
#include<conio.h>
#define TRUE 1
#define SIZE 10
struct link
{
int info;
int next;
};
struct link node[SIZE];
int Getnode();
void Createlist();
void Freenode(int);
void Display();
void Insert(int,int);

```

```

void Delete(int);
int p, avail=0;
void main()
{
int ch=1,i,n,x;
clrscr();
/*Creation of available list*/
for(i=0;i<SIZE-1;i++)
node[i].next=i+1;
node[SIZE-1].next=-1;
printf("\n Create a List:");
Createlist();
while(ch!=4)
{
printf("\n1-DISPLAY");
printf("\n2-INSERT");
printf("\n3-DELETE");
printf("\n4-QUIT");
printf("\nEnter your choice:");
scanf("%d",&ch);
switch(ch)
{
case 1 :
Display();
break;
case 2:
printf("\n Node insertion:after which node:");
scanf("%d",&n);
p=n;
printf("\nEnter the item for insertion:");
scanf("%d",&x);
Insert(p,x);
break;
case 3:
printf("\nEnter the node after which the node will be deleted:");
scanf("%d",&n);
p=n;
Delete(p);
break;
case 4:
break;
default:
printf("\n Wrong choice!Try again:");
}
}
int Getnode()
{

```

```

if (avail== -1)
{
printf("\n Overflow:");
exit(0);
}
p=avail;
avail=node[avail].next;
return p;
}
void Freenode(int q)
{
node[q].next=avail;
avail=q;
return;
}
void Createlist()
{
int x;
char c;
p=Getnode();
printf("\n Enter an item to be inserted:");
scanf("%d", &x);
node[p].info=x ;
node[p].next=-1;
while(TRUE)
{
printf("\n Enter the choice(y/n):");
fflush(stdin);
c=getchar();
if(c=='y'||c=='Y')
{
printf("\n Enter an item to be inserted:");
scanf("%d",&x);
Insert(p,x);
node[p].next= -1;
}
else
return;
}
}
void Display()
{
p=0;
while(node[p].next!= -1)
{
printf("\n%d\t%d\t%d:",p,node[p].info,node[p].next);
p=node[p].next;
}
}

```

```
printf("\n%d\t%d\t%d:",p,node[p].info,node[p].next);
}
void Insert(int r,int x)
{
int q;
if(r==-1)
{
printf("\n void insertion:");
return;
}
q=Getnode();
node[q].info=x;
node[q].next=node[r].next;
node[r].next=q;
return;
}
void Delete(int r)
{
int q;
if(r==-1||node[r].next==-1)
{
printf("\n void deletion:");
return;
}
q=node[r].next;
node[r].next=node[q].next;
Freenode(q);
return;
}
```

Output:

```
Enter an item to be inserted:4
Enter the choice(y/n):y
Enter an item to be inserted:23
Enter the choice(y/n):y
Enter an item to be inserted:87
Enter the choice(y/n):y
Enter an item to be inserted:22
Enter the choice(y/n):y
Enter an item to be inserted:12
Enter the choice(y/n):n
1-DISPLAY
2-INSERT
3-DELETE
4-QUIT
Enter your choice:_
```

```
Enter your choice:2
Node insertion:after which node:3
Enter the item for insertion:99
1-DISPLAY
2-INSERT
3-DELETE
4-QUIT
Enter your choice:1
0      4      1:
1      23     2:
2      87     3:
3      22     5:
4      99     4:
5      12    -1:
1-DISPLAY
2-INSERT
3-DELETE
4-QUIT
Enter your choice:3
Enter the node after which the node will be deleted:_
```

```
4      12      -1:  
1-DISPLAY  
2-INSERT  
3-DELETE  
4-QUIT  
Enter your choice:3  
  
Enter the node after which the node will be deleted:1  
  
1-DISPLAY  
2-INSERT  
3-DELETE  
4-QUIT  
Enter your choice:1

3-DELETE  
4-QUIT  
Enter your choice:4
```

#### 7. Aim: Implementation of stack using array.

```
#include<stdio.h>  
#include<conio.h>  
#include<stdlib.h>  
#define MAXSTK 100  
int top=-1;  
int items[MAXSTK];  
int Iseempty();  
int Isfull();  
void Push(int);  
int Pop();  
void Display();  
void main()  
{  
int x;  
char ch='1';  
clrscr();  
while(ch!='4')  
{  
printf("\n 1-PUSH");
```

```
printf("\n 2-POP");
printf("\n 3-DISPLAY");
printf("\n 4-QUIT");
printf("\n Enter your choice:");
fflush(stdin);
ch=getchar();
switch(ch)
{
case '1':
printf("\n Enter the element to be pushed:");
scanf("%d",&x);
Push(x);
break;
case '2':
x=Pop();
printf("\n Pop element is %d\n:",x);
break;
case '3':
Display();
break;
case '4':
break;
default:
printf("\n Wrong choice!Try again:");
}
}
}
int Isempy()
{
if(top== -1)
return 1;
else
return 0;
}
int Isfull()
{
if(top==MAXSTK-1)
return 1;
else
return 0;
}
void Push(int x)
{
if(Isfull())
{
printf("\n Stack full");
return;
}
```

```
}

top++;
items[top]=x;
}
int Pop()
{
int x;
if(Isempy())
{
printf("\n Stack empty");
exit(0);
}
x=items[top];
top--;
return x;
}
void Display()
{
int i;
if(Isempy())
{
printf("\n Stack empty");
return;
}
printf("\n Elements in the Stack are :\n");
for(i=top;i>=0;i--)
printf("%d\n",items[i]);
}
```

Output:

```
Enter the element to be pushed:78
```

```
1-PUSH  
2-POP  
3-DISPLAY  
4-QUIT
```

```
Enter your choice:1
```

```
Enter the element to be pushed:87
```

```
1-PUSH  
2-POP  
3-DISPLAY  
4-QUIT
```

```
Enter your choice:3
```

```
Elements in the Stack are :
```

```
87
```

```
78
```

```
1-PUSH  
2-POP  
3-DISPLAY  
4-QUIT
```

```
Enter your choice:_
```

```
87
```

```
78
```

```
1-PUSH  
2-POP  
3-DISPLAY  
4-QUIT
```

```
Enter your choice:2
```

```
Pop element is 87
```

```
:
```

```
1-PUSH  
2-POP  
3-DISPLAY  
4-QUIT
```

```
Enter your choice:3
```

```
Elements in the Stack are :
```

```
78
```

```
1-PUSH  
2-POP  
3-DISPLAY  
4-QUIT
```

```
Enter your choice:4_
```

8. Aim: To Create Fibonacci series using recursive function.

```
#include<stdio.h>
#include<conio.h>
int Fibonacci(int);
void main()
{
    int i,n;
    clrscr();
    printf("\n Enter the no of elements to be displayed:");
    scanf("%d",&n);
    for(i=0;i<n;i++)
        printf("%d\t",Fibonacci(i));
    getch();
}
int Fibonacci(int n)
{
    if(n<=0)
        return 0;
    else if (n==1)
        return 1;
    else
        return Fibonacci(n-1)+ Fibonacci(n-2);
}
```

Output:

```
Enter the no of elements to be displayed:13
      0      1      1      2      3      5      8      13     21     34
      55     89    144
```

9. Aim: Calculate factorial of a number using recursive function.

```
#include<stdio.h>
#include<conio.h>
int Factorial(int);
void main()
{
    int i,n;
    clrscr();
    printf("\n Enter the no of elements:");

```

```

scanf("%d",&n);
printf("Factorial of %d is %d",n,Factorial(n));
getch();
}
int Factorial(int n)
{
if(n==0)
return 1;
else
return n*Factorial(n-1);
}

```

Output:

```

Enter the no of elements:5
Factorial of 5 is 120

```

10. Aim: Implementation of queue using array.

```

#include<stdio.h>
#include<conio.h>
#include<stdlib.h>
#define MAXQ 100
int front=0,rear=-1;
int items[MAXQ];
int Isemptry();
int Isfull();
void Insert(int);
int Delete();
void Display();
void main()
{
int x;
char ch='1';
clrscr();
while(ch!='4')
{
printf("\n 1-INSERT");
printf("\n 2-DELETE");
printf("\n 3-DISPLAY");
printf("\n 4-QUIT");
printf("\n Enter your choice:");
fflush(stdin);
ch=getchar();

```

```
switch(ch)
{
case '1':
printf("\n Enter the element to be inserted:");
scanf("%d",&x);
Insert(x);
break;
case '2':
x=Delete();
printf("\n Delete element is %d\n:",x);
break;
case '3':
Display();
break;
case '4':
break;
default:
printf("\n Wrong choice!Try again:");
}
}
getch();
}
int Isempy()
{
if(rear<front)
return 1;
else
return 0;
}
int Isfull()
{
if(rear==MAXQ-1)
return 1;
else
return 0;
}
void Insert(int x)
{
if(Isfull())
{
printf("\n Queue full");
return;
}
rear++;
items[rear]=x;
}
int Delete()
{
```

```
int x;
if(Isempty())
{
printf("\n Queue is empty");
exit(0);
}
x=items[front];
front++;
return x;
}
void Display()
{

if(Isempty())
{
printf("\n Queue is empty");
return;
}
printf("\n Elements in the Queue are :\n");
for(i=front;i<=rear;i++)
printf("%d\n",items[i]);
}
```

Output:

```
1-INSERT
2-DELETE
3-DISPLAY
4-QUIT
Enter your choice:1

Enter the element to be inserted:30

1-INSERT
2-DELETE
3-DISPLAY
4-QUIT
Enter your choice:1

Enter the element to be inserted:40

1-INSERT
2-DELETE
3-DISPLAY
4-QUIT
Enter your choice:1

Enter the element to be inserted:50_
```

```
1-INSERT
2-DELETE
3-DISPLAY
4-QUIT
Enter your choice:3

Elements in the Queue are :
30
40
50

1-INSERT
2-DELETE
3-DISPLAY
4-QUIT
Enter your choice:2

Delete element is 30
:
1-INSERT
2-DELETE
3-DISPLAY
4-QUIT
Enter your choice:
```

50

```
1-INSERT  
2-DELETE  
3-DISPLAY  
4-QUIT  
Enter your choice:2
```

```
Delete element is 30
```

:

```
1-INSERT  
2-DELETE  
3-DISPLAY  
4-QUIT  
Enter your choice:3
```

```
Elements in the Queue are :
```

40

50

```
1-INSERT  
2-DELETE  
3-DISPLAY  
4-QUIT  
Enter your choice:4
```

#### 11. Aim: Implementation of circular queue using array.

```
#include<stdio.h>  
#include<conio.h>  
#include<stdlib.h>  
#define MAXQ 100  
int front=-1,rear=-1;  
int items[MAXQ];  
int Isempy();  
int Isfull();  
void Insert(int);  
int Delete();  
void Display();  
void main()  
{  
int x;  
char ch='1';  
clrscr();  
while(ch!='4')
```

```

{
printf("\n 1-INSERT");
printf("\n 2-DELETE");
printf("\n 3-DISPLAY");
printf("\n 4-QUIT");
printf("\n Enter your choice:");
fflush(stdin);
ch=getchar();
switch(ch)
{
case '1':
printf("\n Enter the nos of element to be inserted:");
scanf("%d",&x);
Insert(x);
break;
case '2':
x=Delete();
printf("\n Deleted element is %d\n:",x);
break;
case '3':
Display();
break;
case '4':
break;
default:
printf("\n Wrong choice!Try again:");
}
}
getch();
}

int Isempy()
{
if(front== -1)
return 1;
else
return 0;
}

int Isfull()
{
if(front== (rear+1)%MAXQ)
return 1;
else
return 0;
}

void Insert(int x)
{
if(Isfull())

```

```
